11/17/14

Dear Mr. Lorito, Mr. Rubinstein,

As to your previous inquiries regarding potential noise complaints at The Emporium in Patchogue NY, our company has taken various decibel readings during the week of November 10th 2014 as requested. Here are our findings:

Nov 12 - Saliva
7:30pm
53dB min.
75dB max.
63dB avg.

Nov 13 - Lil Jon
10:30pm
54dB min.
72dB max.
60dB avg.

Nov 14 - Big Shot
8pm
51dB min.
66dB max.
57dB avg.

9:15pm
56dB min.
68db max.
60dB avg.

12:45am
52dB min.
76dB max.
61dB avg.

11pm
54dB min.
71dB max.
61dB avg.

10:15pm
49dB min.
74dB max.
61dB avg.

2am
39dB min.
75dB max.
58dB avg.

1:24am
54db min.
72dB max.
62dB avg.

Each reading was taken using a Metrosonics Metrologger decibel meter calibrated daily to 102dB. All recorded readings were under an A weight. I hope this information proves to be helpful in your endeavors. If there are any further questions or explanations please feel free to contact me at any time.

These readings were taken at the intersection of Church St & Railroad Ave. On the Northeast corner.

Thank you for your business,

Mike Havern
Operations Manager
